Generado el: 27 April, 2024, 19:54 Parche 2 Publicado por CeltiberoCid - 27 Jul 2016 07:55 Nas, estos son los cambios del parche de manyana 28/7 Total War: WARHAMMER – Update 2 Due Live on 28/07/16 Update 2 is designed to add further polish and tweaks, fixes some notable gameplay issues and brings our second pass at unit rebalancing. Some notable changes include UI scaling for high-resolution displays, performance enhancements and visual improvements for NVIDIA users, and the introduction of the new Siege Attacker trait, enabling armies with Siege Attacker units to immediately initiate sieges without building dedicated siege equipment. A huge level of customisation is now available in Custom and Multiplayer battles. When building your army you can now choose individual spells, items and abilities for your characters. These additions will increase their cost, but provide a level of granularity, individuality, and can skew their battlefield role to suit your playstyle. **New Content** A host of new free content is made available via this update, including the Empire Amber Wizard hero, The Lore of Beasts, The Beastmen as new and terrifying Al-opponent in the Grand Campaign, and four new Custom and Multiplayer battle maps. Sarthorael The Everchosen, the Chaos Lord of Change, is also now available to use as a Legendary Lord in custom and multiplayer battles. Full details on this content can be found in our Free Content Update Blog. **Factions Chaos Warriors**
